Notes:

Release, due to other causes, ran off location. Followup is necessary.

Date: 6/15/2015 Status: Inspection Author: Washek, Sandi

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume: 2.00 gallons

Updated Other Contaminant emulsion and 10 cubic feet of gas release

Notes:

NDDH inspector arrived onsite at 9:30am. Weather was sunny with wind out of the south at 20 mile/hour. The area of impact is located south of the pad about 1000ft. It has been scraped and cleaned up. Area surrounding the site is badlands terrain and no water way was impacted by the spill. Due to rain in the past week, a puddle of water was standing in the location were the spill clean-up occurred. Conducted a chloride strip test on the standing water located on the location and it came back as less then 31ppm. No additional follow-up is required.
